PROFILE

Data Analyst with 1+ year of experience conducting root-cause analysis and translating data insights into actionable change, using SQL, Power BI and Python. Skilled in collaborating across stakeholder groups, handling escalations, and driving data-driven decision-making with a strong controls and governance mindset.

PROFESSIONAL EXPERIENCE

Funds Data Analyst | Value Research

14 Jul 2025 – Present

- Investigate the root cause of data discrepancies and issues, and handle escalated client queries end-to-end; identified a flaw in the category return calculation process, traced it to its root cause, and implemented a fix that significantly improved data accuracy and prevented recurrence.
- Build and maintain SQL and Power BI dashboards/reports for daily funds data analysis, using Python as needed.
- Built and maintained a process to calculate benchmark overlap for funds against their respective benchmarks; continuously monitored, debugged, and refined the process to resolve recurring issues and ensure consistent accuracy.
- Serve as client-facing point of contact, resolving data queries and communicating findings to clients and stakeholders.
- Built automated data pipelines using Selenium and APIs for recurring data-download tasks.
- Contribute data-driven social media stories and collaborate on cross-functional analytics projects.

INTERNSHIPS, TRAININGS & COURSES

Data Analytics | Naresh I Technologies, Hyderabad

Feb 2025 – Jun 2025

- Four-month course covering core Python, NumPy, Pandas, MySQL, Power BI, Tableau, Statistics and MS Excel.

Database Intern | Cadence Design Systems

Jul 2023 – Oct 2023

- Worked on a database project involving data extraction and creation of new databases; gained exposure to Okta and SSO services.

From Excel to Power BI | Coursera

Mar 2024

- Five-module course on managing, analysing and visualizing data using Excel and Power BI.

Big Data | Samsung Innovation Campus

Sep 2023 – Nov 2023

- Upskilled in big data concepts, applications and tools.

PROJECTS

Microsoft & Google Stock Comparison Analysis

- Comparative analysis of Microsoft and Google stock performance using Python, Pandas, Matplotlib and Power BI to compute KPIs and deliver insights supporting investment decisions.

Stroke Analysis

- Explored patterns and risk factors in stroke occurrence using Python and Power BI; performed data cleaning, feature extraction and built an interactive dashboard highlighting key health indicators.

D-Mart Product Analysis

- Analysed D-Mart product data to extract insights on pricing, discounts and category dynamics using Python, Pandas and visualization libraries.

EDUCATION

B.Tech, Information Technology

2020 – 2024

Shri Shankaracharya Institute of Professional Management and Technology | Score: 76.1%

SKILLS & ABILITIES

Root-Cause Analysis • Escalation Handling • SQL • Power BI • DAX • Python • Pandas • NumPy • Data Pipeline Automation • Stakeholder & Client Communication • Data-Driven Decision Making • Project Methodology
